Education

KIET Group of Institutions — Ghaziabad, Uttar Pradesh
Bachelor of Technology in Computer Science ***(CGPA: 7.65)*** — *Nov. 2020 – Jun. 2024*

Delhi Public School — Bulandshahr, Uttar Pradesh
Senior Secondary Education ***(93%)*** — *Apr. 2018 – Mar. 2020*

Experience

Data Science — Dec. 2024 – Present
Whilter AI — *India*

- Contributed to the development of an AI-powered voice assistant for flight booking and customer support, working on agent workflows, tool integrations, API orchestration, and conversational flow optimization using LiveKit.
- Developed and deployed cargo pricing models on 2+ years of historical data using XGBoost and Prophet.
- Built time series forecasting and classical machine learning solutions to improve prediction accuracy and business decision-making.
- Performed data analysis and visualization to identify trends, patterns, and actionable business insights.
- Contributed to the development and optimization of a face swap model, improving visual quality and facial tracking consistency across video frames.
- Collaborated on text-to-speech and voice cloning pipelines, assisting with model training, evaluation, and real-time inference optimization.

Data Science Intern — Sep. 2024 – Dec. 2024
Whilter AI — *India*

- Developed proficiency in Python, NumPy, Pandas, and Matplotlib for data processing and analysis tasks.
- Built automation scripts reducing manual processing effort by 60 percent
- Implemented machine learning models using Scikit-learn to gain practical experience with predictive analytics.
- Worked with public APIs and BeautifulSoup-based web scraping pipelines to collect and preprocess training data.

Projects

AI Voice Bot | *Python, LiveKit, STT, TTS, SIP, Webrtc, LLM, Api's,* — Jan. 2026 – Present

- Worked on developing an AI-powered voice assistant for flight booking and customer FAQ handling using the LiveKit framework.
- Built and optimized the agent for voice interaction pipelines using Speech-to-Text (STT) and Text-to-Speech (TTS) technologies.
- Developed tool and API management services to handle agent actions, workflow execution, and external tool calls.
- Resolved conversational and workflow issues through prompt engineering, debugging, and implementation of specialized functions.

Face Swapping and Tracking Pipeline | *OpenCV, InSwapper, GFP-GAN, Buffalo* — Aug. 2025 – Sep. 2025

- Developed an end-to-end video face swapping pipeline with consistent identity tracking across frames.
- Implemented Buffalo for face detection, cosine similarity for tracking, and InSwapper + GFP-GAN for high-quality face enhancement.
- Engineered an optimized tracking and swapping workflow for real-time video processing with stable face alignment usnig the Deepsort
- Implemented DeepSORT-based tracking to maintain identity consistency across video frames.

Automated Cargo Pricing | *Python, Optuna, Seaborn, ML, EDA, Feature Engineering* — Jan. 2025 – Jun. 2025

- Worked on time series forecasting using models such as XGBoost and FB Prophet.
- Built feature engineering pipelines to preprocess, reorder, and enrich time series data.
- Performed exploratory data analysis (EDA) to extract insights and guide model development.
- Engineered 30+ temporal and weather-based features to improve forecasting performance.
- Handled diverse input data for training and forecasting, including categorical, numerical, and temporal features.

Technical Skills

Languages: Python, SQL, HTML/CSS
Developer Tools: Git, Google Cloud Platform, AWS, Livekit, Microsoft Azure, Power BI, Docker, VS Code, PyCharm, Cursor
Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn, Transformers, TensorFlow, PyTorch
Data Science & ML: Exploratory Data Analysis (EDA), Feature Engineering, Model Building, Evaluation Metrics, Supervised Learning, Predictive Analytics, Classical Machine Learning, Time Series Forecasting, LLMs, AI Agents, voicebots, RAG, REST APIs, Prompt Engineering,
